

OPEM SUMMER SCIENCE TEACHER TRAINING 2018

Don't miss the special edition of African Science Teacher training of the year. From 6th to 13th Augustus 2018 at Lomé/Togo, joins de STEM teachers who enhance education methode and its implementation in Africa.

Let's move to a practice science teaching and research, necessary for a concrete scientific and technological knowledge. Harness this competencies to promote sustainable development in Africa.

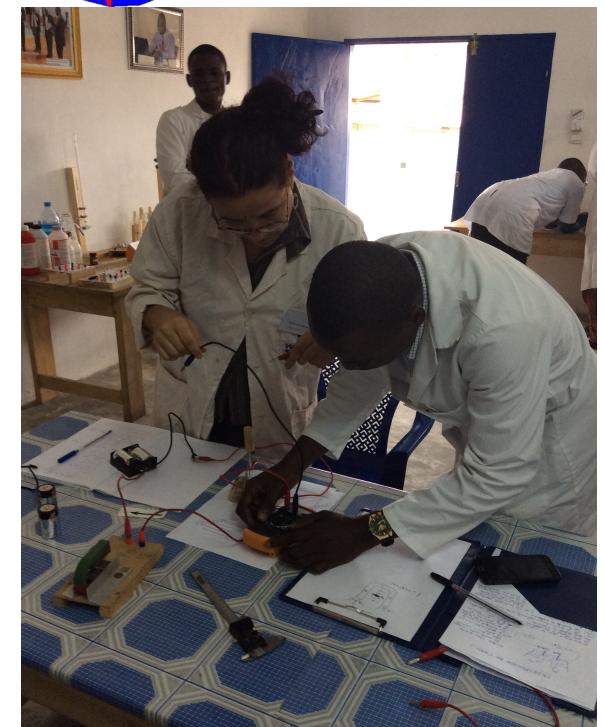

We have a digital generation of learners and ICT has become an essential tool for quality education. OPEM SSTT is the cross point of Physics, Chemistry, Mathematics and Life science teachers to improve their capabilities in the contents, in pedagogy, methodology and the harness of ICT in quality science teaching.

The workshops are the main points of OPEM SSTT, where teachers appreciate to manipulate in group, sharing knowledge and experiences, using simulation programs and ICT for research. OPEM SSTT helps teachers in ICT skills development.

STEM teacher is a lab equipements creator. OPEM SSTT teaches the trainees on that fiels and they return with 3 lab equipements they create themseves.
